

CHR. BOCK & SOHN
VERPACKUNGSANLAGEN

SAB 150

BLOCK-packaging machine

As a convincing service partner we provide you with thorough advice and service before and during the order processing and of course beyond this, with a reliable after sales service. Design, mode of operation and handling of our machines are always state of the art in technology.

RANGE OF APPLICATION

Fully automatic packaging machine for butter, margarine and other edible fats, as well as other comparable products of especially soft consistencies and various sizes for further industrial processing. The SAB 150 is the perfect machine for packing blocks of larger scale. This block packaging machine is optimized in design and function to meet the highest standards of packaging quality and process reliability.

GENERAL INFO

In combination with the CHR. BOCK & SOHN developed volumetrically controlled valve piston system VKD, the SAB 150 achieves an excellent weight accuracy even with very soft products. In this combination the SAB 150 is therefore perfectly suited for the butter industry. Our plants are equipped with the latest touch screen technology and a touch screen optimized control system. This allows an easy and intuitive operation of all recipes and production parameters. With the in-house developed ‚Beluga Clean Line‘ design in combination with the ‚Mood-line‘ status function, a maximum efficiency is always granted.

FUNCTION

The infeed of the product is realized in a hygienically closed system by one of our dosing units. A long inlet cone and heated extruding mouth-piece ensure gentle product infeed and accurate shape. The product cutter guarantees an extreme smooth cut during idle product flow with absolute shape accuracy.

The ‚U‘-shaped wrapping of the blocks followed by side folding through folding units completes the packaging procedure on the highest level of quality.

TECHNICAL FACTS

BLOCK-packaging machine SAB 150

range of size:	10 kg - 25 kg
maximum performance:	7,5 t/hour
packaging material:	min. 60 g/m ²
energy consumption:	7,4 kW in total
weight of machine:	1,8 t
handling:	line supervision (1 person)

ADVANTAGES

clear advantages ...

- robust and compact design
- intuitive operation via colour touch screen
- highest weight precision
- excellent accessibility to all areas
- hygienically encapsulated packaging area
- sectional tempering for extrusion unit
- meets highest hygienic standards
- ‚Beluga Clean-Line‘ for function and design
- ‚Mood-Line‘ with enhanced optical status signal
- world wide teleservice via internet
- well established technical concept - made in Germany

ACCESSORIES

... and everything that goes with it

- block-precutting unit
- paper reel transporter with lift function
- CIP-cleaning system
- resting tubes in various formats
- resting tube heating system
- sieve and hole plates
- check weigher

best combinable with ...

- cartonizer BWA 25-V
